Chapter 7
Solving Systems of Equations and Inequalities

In this chapter, you’re going to extend your ability to solve equations to include solving a system of two equations with two variables. You will learn methods of solving a linear system, including graphing, substitution, and elimination, and how to determine which method is best for a given situation.

These are the lessons on which you will be tested at the end of the chapter:

- Solving Systems by Graphing
- Solving Systems Using Substitution
- Solving Systems Using Elimination
- Application of Linear Systems
- Graphing Linear Inequalities
- Systems of Linear Inequalities

Please keep track of your homework assignments and class work for this chapter on the back of this page. The more organized you keep your work, the easier it is to study and get a better grade on the test.
